PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years of experience analyzing large datasets, developing Power BI dashboards and using SQL to support operational and executive decision-making. Proficient in SQL, Power BI, Python and Advanced Excel, with demonstrated success in improving reporting efficiency, data accuracy and delivering actionable business insights.

SKILLS

Data & Programming: SQL, Excel, Python (*NumPy, Pandas, Matplotlib, Seaborn*), Statistics, Probability, Machine Learning (Foundation)
Business Intelligence: Power BI, DAX, Power Query, Tableau
Automation: Power Automate, Web Scraping
Analytics: Data Analysis, Data Visualization, Data Cleaning, Data Modelling, Data Validation, Data Integrity, Dashboard Development

WORK EXPERIENCE

Executive, HCL Technologies (August 2023 – March 2026)

- Built **Power BI dashboards** for **executive reviews** by transforming raw operational data into **executive-ready insights**, enabling leadership to **monitor KPIs** and **segment health** across a **\$4Bn+** business portfolio.
- Analyzed \$7Mn+** in customer receivables by leveraging **SQL** to identify **collection risks**, **payment trends** and recovery priorities that supported business logic based PDD reporting and informed **senior management decisions**.
- Spearheaded User Acceptance Testing (UAT) for **automated reports** by understanding **stakeholders' requirements**, designing test cases, **validating report outputs** before deployment and **coordinating issue resolution**, reducing report generation time from 90 minutes to 2 minutes (**98% efficiency gain**).
- Automated** system output validation by building an **AI-assisted Excel model** using advanced formulas, **resolved mismatches** and improving **data accuracy to 99%**, strengthening **reporting reliability**.
- Conducted **root cause analysis** by reconciling data across **multiple enterprise systems (CRM, SAP)** using **SQL and Excel**, identifying **inconsistencies** and **recommending corrective actions** that improved reporting **accuracy from 85% to 95%**.
- Collaborated with **cross-functional stakeholders** to translate **business requirements** into **analytical reporting solutions**, enabling **ad-hoc analyses**, dashboard development and executive decision-making across multiple business functions.
- Evaluated regional collection forecasts and recovery trends across **5 global regions** by developing interactive Power BI dashboards, improving management visibility into collection pipelines and forecast performance, supported recovery of over **\$1Mn**.
- Monitored invoicing performance across **300+ accounts daily** by assessing billing backlogs, aging trends and regional performance **using Excel (Lookup functions, Pivot Tables)** identifying operational bottlenecks that reduced invoice **delays by 70%**.
- Compared **forecasted** versus **actual business metrics** for high-value contracts, identified key variances and recommended data-backed improvements, improving **forecast accuracy to approximately 95%**.
- Documented **business requirements**, reporting logic and validation procedures to ensure consistency across analytical reports.

PROJECTS

Customer Segmentation & Interest Analysis | SQL ([GitHub](#))

- Analyzed **14,000+** customer interaction records using **CTEs, JOINS, Window Functions, Aggregations** and **Subqueries**. Performed **data cleaning** and **validation** to identify engagement trends, uncovering the dominant sector contributing **21.22%** of total activity.

Cabs Service Performance & Passenger Behaviour Analysis | Power BI ([GitHub](#))

- Evaluated **425K+** cab trip records to analyze operational performance and target achievement using **Star Schema, Power Query, DAX, KPIs, tooltips, bookmarks** and **field parameters**, revealing **80%** of revenue being generated by **60%** of cities.

US Airlines Web Scraping and Analysis | Python (Pandas, Requests, BeautifulSoup, Matplotlib, Seaborn, EDA) ([GitHub](#))

- Developed an end-to-end **automated Python data pipeline** using **Python** to **automate web scraping, data cleaning, CSV generation, visualizations** from **4 airline datasets**, reducing manual **data preparation by 90%**.
- Performed **exploratory data analysis (EDA)** to uncover a post 2020 recovery with leading carriers increasing **ASM by over 100%**.

CERTIFICATIONS

- [AI for Data Analysis – Badge](#) ([Google](#))
- [Certificate of Accomplishment - SQL \(Advanced\)](#) ([HackerRank](#))
- [Advanced Microsoft Power BI](#) ([Coursera](#))

AWARDS AND RECOGNITIONS

- 2Good Award | HCLTech:** Honored for distinguished executive reporting and performance over two consecutive years. (2025)
- Certificate of Recognition LIVE WIRE | HCLTech:** Awarded for a continuous improvement mindset and process optimization. (2025)
- Letter of Recommendation | Vishalakshi Foundation:** Received in recognition of exemplary leadership as Team Vice President. (2024)

EDUCATION

Ramjas College, University of Delhi (August 2020 – July 2023)
Bachelors of Commerce (Hons.) (Cumulative GPA: 8.38)
